

Thomas Eiwegger earned his doctoral degree at the Medical University of Vienna, Austria, where he also completed his pediatric training. He did his post-doc at the Swiss Institute of Asthma and Allergy in Cezmi Akdis' group (2008-2010), and after returning to the Medical University of Vienna, he completed his training in Pediatrics, pediatric allergy, and pediatric respiratory medicine. He habilitated in 2012 in Paediatrics. Thereafter, he completed the fast-track tenure at the Medical University of Vienna and worked as principal investigator, group leader, and staff physician at the level of an associate Professor at the Department of Paediatrics and Adolescent Medicine. In the summer of 2015, he moved to the Hospital for Sick Children in Toronto as a clinician-scientist and Co-director of the Food Allergy and Anaphylaxis Program at SickKids. During this time, he successfully completed the Pediatric Leadership program at Harvard Medical School.

Since 2021 he has been the head of the Department of Pediatrics at the University Clinics St. Poelten, Associate Professor at the Karl Landsteiner University, Krems and Assoc. Prof, Department of Immunology, University of Toronto, and is an adjunct scientist at the Research Institute at the Hospital for Sick Children in Toronto.

He currently leads research groups in Toronto and Austria that focus on the biomarkers and mechanisms of tolerance development in the context of atopic diseases and novel treatment approaches to food allergy.

Thomas Eiwegger published more than 140 peer reviewed articles (>6500 citations, H-index:45), performed more than 100 lectures in national and international congresses, and institutional rounds. He is an established reviewer (>300 reviews), supervises clinical fellows, master and PhD students and he lectures at the Department of Immunology at the University of Toronto and Karl Landsteiner University in Krems. Dr. Eiwegger is associate editor of the top journal Allergy, serves on the review board of JACI, and editorial boards of Frontiers in Allergy and the International Archives of Allergy and Immunology.
